Material :
LLD-PE,
linear low density polyethylene

Standard Colour :
natural

This range is designed to seal PVC pressure pipe on which a connector is fitted at one end. The unique vertical rib design allows to apply the same size of plug to both the plain end and connector end of the tube.

This simplifies storage routines. These plugs ensure full-length insertion, the distance from the end of the pipe down to the seal ring and retention ribs offer added security during transit and the perforated handgrip allows for easy removal.
